

ONLINE MOVIE TICKET BOOKING SYSTEM

Movie ticket booking system is a platform for booking movie tickets. This project provides the customer for booking movie tickets online & avoid standing in long queues. The user can view movies released, number of seats available for the show, show timings and ticket bookings. Tickets can also be cancelled if needed. Tickets can be purchased online at any time of the day or night from anywhere on the planet.

The project has only two modules :

1. Admin
2. User

Admin

- Log in, Log out
- Add, Delete, Update Movie details(Movie name, Genre, Ticket fare, etc.,)
- Create shows for the movies (Show timings and date)
- Add theatre(Theatre name, location, No. of seats)

User

- Search for movies
- Check movie's show availability
- Reserve tickets
- Pay for the tickets & generate ticket

Existing system

The user who wishes to watch a movie in a theatre needs to go to the ticket counter directly and stand in queues. The users may not even get the tickets if the tickets are sold out.

Designed system

The user can book the movie tickets online and select the favourable seat. The user doesn't need to wait in long queues. User can aware of the seat availability and the available shows in a theatre. The generated ticket can show to the theatre employee so doesn't need to print the ticket.

Technologies using

Front-end : HTML, CSS

Back-end : PHP, MySQL

Weekly plan

Creating a module and its functionalities in each week.
